

My Brain is Great at Being....

Find out what your brain is great at by accepting this challenge:

MindPlus

1. Each student gets an A4 piece of paper and nothing else (no scissors, tape or glue etc). They must create something with the piece of paper in 5 mins. NO PAPER PLANES. They can rip the paper.
2. Come together as a group and share their creations.
3. Ask students to think about how their brains helped them during that task. Ask "was your brain great at...?" hold up each card and ask students to stand if their brain was great at that particular skill.
4. What does this task tell us about our own brain? What does it tell us about other's brains? Are we all the same?
5. Optional extension: identify what brain skills would be useful in the different given scenarios.
